COVID-19 VACCINE — KNOW YOUR OPTIONS

Many providers are now offering the vaccine, including health systems, county health departments, grocery store and pharmacy chains. The state of Michigan receives a limited supply of vaccines and divides it among these organizations. We encourage you to explore the options and get your vaccine wherever you can when it's your turn. When you become eligible to receive a vaccine through Henry Ford Health System, we will contact you through your Henry Ford MyChart account. **Visit [HenryFord.com/COVIDVaccine](https://www.henryford.com/COVIDVaccine).**

VIRTUAL WALK FOR HEART HEALTH

Heart disease is the nation's number one killer, and both heart disease and stroke can have a deep and lasting impact on our families, friends and the communities we serve. Join us as we once again partner with HAP to support the American Heart Association's 28th annual — and now virtual — Metro Detroit Heart & Stroke Walk/Run on Saturday, May 15. **Visit [MiHeartWalk.org](https://www.miheartwalk.org)** to learn how you can make a difference in our community and help the AHA in their efforts to fast track research to better understand COVID-19 and its interaction with cardiovascular disease.

EARLY LUNG CANCER DETECTION SAVES LIVES

Henry Ford's Lung Cancer Screening Clinic provides early detection for people 55 to 77 years old with a significant smoking history. For those who are eligible, most insurance companies do not charge a copay or deductible for the lung cancer screening. **To determine if you qualify, visit [HenryFord.com/LungScreening](https://www.henryford.com/LungScreening).** Henry Ford Macomb is among the first hospital's in the U.S. with a new innovation that holds promise to fight lung cancer. Our new robotic technology is used to view the inside of the lungs and obtain a tissue sample of small and hard-to-reach nodules for biopsy, which allows for earlier and more-accurate diagnosis.

Visit [HenryFord.com](https://www.henryford.com) to sign up for our FREE monthly health e-newsletter featuring health and wellness articles.

WHEN SHOULD YOU GET A CANCER SCREENING?

MANY OF US PUT OFF DOCTORS' APPOINTMENTS AND ROUTINE HEALTH EXAMS. But being proactive about your health can prevent serious issues from developing down the line. Case in point: Cancer screenings.

Every cancer is different, and certain types are more likely to affect a person at various stages of life. Individual factors such as a family history, genetics or gender also play a role. Find out what screening tests are right for you based on the guidelines below and by talking with your doctor.

COLON CANCER

Screening Age: 45-50. Frequency: Every 5-10 years.

Options include: colonoscopy, CT Colonography, Fecal Immunochemical Testing, and Cologuard testing.

BREAST CANCER

Screening Age: 40. Frequency: Every 1 to 2 years.

Mammograms should begin at age 40, unless there is a family history or personal risk for breast cancer.

PROSTATE CANCER

Screening Age: Varies. Frequency: Every 1 to 2 years.

Prostate cancer screening should begin at age 50 for average risk men. Men at high risk should begin between 40 and 45.

LUNG CANCER

Screening Age: 55. Frequency: Varies.

The need for a lung cancer screening depends on a person's history of smoking.

CERVICAL CANCER

Screening Age: 20-21. Frequency: Every 3 years.

A Pap test is the most common method of screening for cervical cancer.

Visit [HenryFord.com/CancerScreening](https://www.henryford.com/CancerScreening) to learn more about what type of cancer screening is right for you.

STROKE: YOUR TOP 4 QUESTIONS ANSWERED

EVERY 40 SECONDS, SOMEONE IN AMERICA HAS A STROKE. It's the fifth leading cause of death, and the most common cause of disability in the United States.

A stroke occurs when the blood supply to part of your brain is cut off. When this happens, brain cells begin to die due to lack of oxygen. Delayed diagnosis and treatment can result in permanent disability or death, so seeking immediate medical attention is critical.

Alex Chebl, M.D.

Many people have questions around what happens during a stroke and how they can prevent it. Henry Ford stroke and interventional neurologist, Alex Chebl, M.D., answers the four most common questions about stroke.

WHAT HAPPENS IN THE BRAIN DURING A STROKE?

"There are two types of stroke. Ischemic stroke, which is the most common type, is when the brain's blood vessels become blocked restricting blood flow. Hemorrhagic stroke is when there is a rupture of a brain artery or vein resulting in excess pressure on the brain. Both types cause damage to the brain," says Dr. Chebl.

HOW DO STROKES IMPACT THE BRAIN AND BODY?

“A stroke damages brain cells so they no longer work properly,” says Dr. Chebl. “Depending on the part of the brain that is damaged, patients can have a variety of symptoms, such as paralysis, numbness on one side of the body, speech difficulty, blindness, double vision, trouble walking, headache, and in extreme circumstances, coma or death.”

ARE STROKES PAINFUL?

“Most strokes are actually painless, except when you have brain hemorrhage, which causes increased pressure on the brain,” says Dr. Chebl. “Brain hemorrhages during stroke can sometimes be associated with a sudden, severe headache.”

ARE STROKES PREVENTABLE?

“Yes, that is the good news. Most strokes are preventable because many of the common risk factors are treatable,” says Dr. Chebl. “Risk factors include high blood pressure, diabetes, high cholesterol, smoking and obesity, which are all treatable conditions. The most common cause of major stroke is atrial fibrillation, which is an irregular heart rhythm that can be managed by blood thinners.”

When you or a loved one is having a stroke, every second counts. If you suspect stroke, call 9-1-1 immediately and get to the nearest emergency room.

Visit [HenryFord.com/Stroke](https://www.henryford.com/stroke) for more information about how the Henry Ford Stroke team offers the most advanced diagnostic tools and treatment options available.

WHEN STROKE STRIKES, ACT FAST
Use **FAST** To Remember The Warning Signs Of A Stroke.

 **FACE**
Ask the person to smile.
Does one side of the face droop?

 **ARMS**
Ask the person to raise both arms.
Does one arm drift downward?

 **SPEECH**
Ask the person to repeat a simple phrase.
Is their speech slurred or strange?

 **TIME**
If you observe any of these signs,
call 9-1-1 immediately.

ARE YOU AT RISK?

Age, gender, ethnicity and family history can all play a role in stroke risk, so understanding your unique risk factors can help you take steps toward prevention. Stroke screening and diagnosis at Henry Ford can give you the answers you need. **Visit [HenryFord.com/Stroke](https://www.henryford.com/stroke) and take our free stroke risk assessment.** It's a simple way to evaluate your lifestyle and determine any changes you can make to prevent stroke.

SPRING INTO FITNESS

SPRING IS A TIME OF REBIRTH AND RENEWAL. The sun is shining, the flowers are blooming and you're slowly beginning to shed layers of clothing. And while many people view the season as a time to declutter or clean out closets and kitchens, it's also a great time to get outside and get moving with a new fitness routine. So, whether your preferred activity is hiking or biking, you can spring clean your fitness routine with these six strategies:

- 1. TRY SOMETHING NEW.** There's no better time to adopt a new, healthy habit. If you have extra time on your hands, consider picking up a new activity. It only takes three weeks to establish a habit.
- 2. DRINK MORE WATER.** Dehydration can lead to heat exhaustion, heat stroke, and in extreme cases, death. Get in the habit of drinking water throughout the day even before you start a new fitness routine. Find it difficult to drink enough water? Try an infused water blend.
- 3. GET NEW GEAR.** If you've been running in beat-up sneakers, there's no better time to invest in a new pair. In addition to protecting yourself from injury, new shoes can amp up your workout.
- 4. WEAR SUNSCREEN AND REPELLANT.** If you're heading outside to exercise, it's important to protect yourself against the elements. While 10 to 15 minutes of unprotected sun exposure may supply a healthy dose of vitamin D, more than that can increase your risk of sunburn and skin cancer.

5. BE REALISTIC. Over the past year, many people have put their fitness goals on hold due to the COVID-19 pandemic, so as you start to get back into fitness, make sure to set realistic and attainable goals. If you've never biked before, don't sign up for a 100-mile race straight out of the gate. Not only do you run the risk of not being able to achieve your goal, you may also succumb to an overuse injury from pushing yourself too hard. Focus on setting small goals and build up from there.

6. TAKE TIME FOR REST AND RECOVERY. Always listen to your body. It's okay to be sore and feel some aches and pains, but if something feels sharp or out of the ordinary, it's important to get it checked out.

Before starting a new exercise routine, it's always a good idea to talk with your Henry Ford doctor. It's important to know where you stand on things like blood pressure, cholesterol and vitamin deficiencies before overhauling your exercise program.

The reality is, there's no better time to focus on your physical weaknesses and transform them into strengths. Most important, don't let COVID-19 force you to take a step back from a healthy lifestyle; there are plenty of ways to get moving outside while social distancing.

LIVING WITHOUT JOINT PAIN

When starting a new fitness routine, chronic joint pain can flare up. At the Henry Ford Center for Joint Replacement, our team of nurse navigators, physical therapists and physicians are ready to work with you on a tailored treatment plan to get you back to what you love. If you're not ready for surgery, we offer joint preservation classes. When you are, we offer unique pre-surgical classes to help prepare you for what to expect before, during and after surgery. We're here to help every step of the way – virtually and in-person.

Not sure if you're ready for a joint replacement?

Take our joint pain quiz at [HenryFord.com/JointPainQuiz](https://www.henryford.com/jointpainquiz). Call 1-800-532-2411 to schedule an appointment with a Henry Ford joint specialist.

LYNN EXCEEDED WEIGHT LOSS GOAL DURING STAY AT HOME ORDER

WHEN LYNN KASLLY'S DAUGHTER GOT ENGAGED IN 2019, THE FAMILY PULLED OUT LYNN'S 1987 WEDDING DRESS FROM STORAGE FOR FUN.

"It didn't come close to fitting me," said Lynn. "It was a huge reality check and extremely depressing."

The upcoming wedding and an impending milestone birthday gave Lynn the extra motivation she needed to lose weight.

FINDING THE RIGHT PROGRAM

She started looking into options. She called one place that promised "lose 40 pounds in 40 days."

"It wasn't what I was looking for. Then I found Henry Ford Center for Weight Management. I went to an information session and felt comfortable enough to sign up that day," said Lynn.

She liked the plan's three different phases and the option to choose the one that fit her best. She started with Healthy Solutions, which allowed her to eat as much as she wanted, if the food was on her plan.

She was also very impressed with the instructors.

"These are nurses, dieticians and exercise physiologists - all experts in their fields," said Lynn.

PANDEMIC PAUSE

Then COVID hit. As a dental hygienist, Lynn's office was closed for three months during the Stay at Home Order. She used the extra time to focus on her weight loss goal.

She met virtually with her Center for Weight Management coaches every week and attended virtual group classes for extra support.

Exercise was a big part of losing the weight and keeping it off. She created a walking routine with her group of friends, and they've stuck with it.

Lynn also golfs, and now walks instead of renting a cart to get in extra steps.

A CHANGE FOR THE BETTER

When she returned to work 40 pounds lighter, people were shocked and told her how great she looked.

"I came back with a ton of energy, confidence and a positive attitude," said Lynn.

She is down a total of 90 pounds and is still losing weight.

"Before I started the program, I had just bought a dress for my daughter's wedding. By the time the stores reopened after the shutdown, I needed a new dress because the old one fell off me. I am down 5 dress sizes," Lynn shared.

"I not only look better, but I feel so much better overall. That has become my drive to keep going. I am so thankful for this journey," said Lynn.

Whether your goal is to lose 20 pounds or more than 100, Henry Ford Macomb offers the coaching, support and accountability needed for healthy weight loss and long-term maintenance. Call (586) 323-4800 to register for a free information session.

Classes

C.A.R.E. PROGRAM VIRTUAL CLASSES

Take an opportunity to focus on YOUR health and wellness. Attend these FREE virtual support sessions designed especially for you. Classes are open to caregivers, patients, family, friends and the community.

Creative Mindfulness with Art

WEDNESDAYS
10 A.M.

THURSDAYS
6 P.M.

These sessions are designed for people of all ages and are guided by an art therapist. New project offered each week. Topics covered will focus on self-awareness, support systems, gratitude and reframing negative thoughts.

Kids Art Club

FRIDAYS
11 a.m.

Join us for art lessons for school-age kids. Designed for kids who are learning remotely, homeschooling or are not in school yet. Sessions will be taught by a registered art therapist using the teaching artistic behavior (TAB) approach. TAB is learner-directed to meet the needs of all learners through choice, agency, flexibility and emergent curriculum.

Caregiver Support Groups

TUESDAYS
11 a.m. AND 6 p.m.

Do you provide care for a loved one? Join this class to connect with fellow caregivers and care giving experts for support and information. Participants must be 18 or older.

Visit [HenryFord.com/CaregiverWellness](https://www.henryford.com/CaregiverWellness) to register for the classes listed above. Registration is required due to limited capacity. You will receive a link for the class after registering. Join by telephone, computer, tablet or iPad.

For questions, call (866) 574-7530 or email CaregiverResources@hfhs.org. Classes are sponsored by Henry Ford Health System C.A.R.E. Program (Caregiver Assistance Resources and Education).

ADVANCE CARE PLANNING

One-on-one meetings with trained facilitators help individuals and families learn how to plan for medical decisions based on their medical conditions, goals of care and faith and values, as well as complete an advance directive.

Call (248) 325-1284 to register.

FREE NARCAN TRAINING OFFERED ONLINE

In partnership with Henry Ford Health System, Families Against Narcotics offers free online Narcan training classes for those who want to learn how to administer the life-saving antidote for a narcotics overdose. Participants receive a free kit by mail with two doses of Narcan in nasal-spray form.

Visit [FamiliesAgainstNarcotics.org/Naloxone](https://www.FamiliesAgainstNarcotics.org/Naloxone) for more information, training dates and to register.

EXPECTANT AND NEW PARENTS

Join us for online virtual birthing classes. Learn the same material as the traditional in-person classes from a remote, safe environment. Share videos and have your questions answered, just like in the classroom setting.

Childbirth Preparation

Topics include stages of labor, relaxation, massage, pressure points, breathing techniques, labor coping skills and postpartum.

Infant Care

An introduction to newborn care. Learn the basics of caring for and understanding your newborn baby's needs.

Breastfeeding

Experience the benefits and basics of breastfeeding. Learning the best practices will give you an early, great start to breastfeeding.

Birthing Center Virtual Tours

We understand that expectant parents want to see the environment where they will welcome a new family member. While in-person tours are on hold due to COVID-19, we are currently offering "virtual tour" videos and photos to help familiarize you with our various Birthing Centers. **Visit [HenryFord.com/ChildbirthTours](https://www.henryford.com/ChildbirthTours) for a look at our rooms, amenities and more.**

Visit [HenryFord.com/Baby](https://www.henryford.com/Baby), call (248) 325-0037 or email Sarah.Lavery@hfhs.org for more information, including additional classes, dates, times, class pricing and to register.

THE GRAND PLAN: INFANT CARE FOR GRANDPARENTS

As time has progressed, so have the ways to care for a newborn. Join us online as new and expectant grandparents prepare for this special time in their lives. Learn communication between parents and grandparents, how grandparents can help during pregnancy, birth and after Baby is born, current guidelines for infant care, and ways to bond with your new grandchild during a pandemic.

For more information or to register, visit [HenryFord.com/Baby](https://www.henryford.com/Baby), call (248) 325-0037 or email sarah.lavery@hfhs.org.

WEIGHT MANAGEMENT

While normal schedules and routines have been disrupted, the structure and support offered by our virtual weight loss programs are more important than ever. Henry Ford Macomb's Center for Weight Management offers individual coaching, group support and accountability to help you successfully achieve your weight loss goals, all from the comfort of your own home.

Call (586) 323-4800 or email weightinfo@hfhs.org to get started.

DIABETES PREVENTION PROGRAM

Pre-diabetic patients can learn how to change their lifestyle to prevent type 2 diabetes.

Call (586) 263-2993 or email dppregistration@hfhs.org to register for remote classes.
