HENRY FORD HEALTH

Medicare billing notice

Your Guide to Medicare Billing

This notice explains how you are billed for services so you know what to expect and can plan for out-of-pocket costs. This is not a change in Henry Ford Health billing practices, just more information so you can better plan and understand your care and any bills you get.

How will I be billed for today's services?

This location is an outpatient department of Henry Ford Hospital. This impacts the way Medicare calculates your bills and copays. It may also affect your out-of-pocket costs if you do not have Medigap or secondary/supplemental insurance.

The fees for this location are split into two parts:

- A facility fee for the location
- A professional fee for the doctor or healthcare professional that provides you care

These separate fees will usually appear on the same statement.

Can I get an estimate for my coinsurance payment?

Below is an idea of what you might expect your facility fees to be (this does not include the professional fees). This can change based on the services you get and your health insurance coverage.

- Clinic visit: $10
- Clinic procedure: $35 to $50

How can Henry Ford Health help me?

Our goal is to make sure you get the care you need. If paying your medical bill is a concern or you are confused about your bill, call the Customer Service Department. Each hospital has their own customer service department. Visit henryford.com/visitors/billing/cost-of-care/provider-based to find the location best for you.

If you want more details about your coinsurance or out-of-pocket costs, the Pricing Department can help. Call 888.455.2678 or visit henryford.com/estimate for more information.
