Hand and Wrist Care at Henry Ford Health

Hand and wrist pain can severely impact your quality of life. If your hands and wrists are not working properly, even simple tasks can become difficult. The team of orthopedic and plastic hand surgeons at Henry Ford are experts in upper extremity care who specialize in treating the most complex hand and wrist conditions, even those that involve blood vessels or nerves. Our division prides itself on delivering leading-edge treatments, such as wide-awake surgery and endoscopic surgery at some of our locations, in addition to treating conditions that don't require surgery to help you find relief fast.

Research Based Advanced Orthopedic Care

Our team includes active clinical researchers in areas including hand trauma, carpal tunnel syndrome, arthritis, work-related injury and joint replacement. We regularly publish in peer-reviewed journals and follow patient outcomes to better inform our care. And all of our hand surgeons have had specialized hand surgery fellowship training along with their orthopedics or plastic surgery training.

The Henry Ford Hand and Wrist team diagnoses and treats a variety of hand and wrist conditions, such as:

- Carpal tunnel and cubital tunnel syndrome
- Traumatic hand injury
- Simple and complex fractures
- Hand, thumb, wrist and elbow arthritis
- Wrist reconstruction
- Hand and wrist sports injuries
- Tennis elbow or golfer's elbow
- Trigger finger and tendonitis
- Congenital hand conditions
- Soft tissue reconstruction/microsurgery
- Upper extremity lumps and tumors

For more information about our hand and wrist program or to schedule an appointment, visit [henryford.com/hand](https://www.henryford.com/hand) or call us at:

Detroit or Southeast Michigan Patients: 313.751.8855
